TENTH REPORT OF THE ONTARIO
PARKS INTEGRATION BOARD

1968

HON. A. KELSO ROBERTS, Q.C.
Chairman
Minister of Department of Lands and Forests

HON. JAMES A.C. AULD,
Acting Chairman
Minister of Tourism & Information

The Honourable W. Earl Rowe,
Lieutenant-Governor of the Province of Ontario.

MAY IT PLEASE YOUR HONOUR:

The undersigned is pleased to present to Your Honour
the annual report of The Ontario Parks Integration
Board for the period ending December 31, 1966.

Respectfully submitted,

C. S. MacNaughton

C. S. MacNaughton
C. S. MacNaughton,
Provincial Treasurer.

April 17, 1968.

MEMBERS OF THE ONTARIO PARKS INTEGRATION BOARD

1 January, 1966 to 31 December, 1966

CHAIRMAN

The Hon. A. Kelso Roberts, Q.C.,
Minister of Lands and Forests.

VICE-CHAIRMAN

The Hon. J. A. C. Auld,
Minister of Tourism and Information.

MEMBERS

The Hon. J. N. Allan,
Provincial Treasurer.

Mr. Charles Daley,
Chairman,
Niagara Parks Commission.

The Hon. J. W. Spooner,
Minister of Municipal Affairs.

The Hon. S. J. Randall,
Minister of Economics and Development.

The Hon. J. R. Simonett,
Minister of Energy and Resources Management.

The Hon. W. A. Stewart,
Minister of Agriculture and Food.

Mr. Fernand Guindon,
Chairman,
St. Lawrence Parks Commission.

The Hon. T. R. Connell,
Minister of Public Works.

SECRETARY TO THE BOARD

C. R. Tilt, B.A.

Assistant - Mrs. T. Bennett

The period covered in this Tenth Report of the Ontario Parks Integration Board extends from the 1st day of January, 1966 to the 31st day of December of the same year and has proven to be the most active of the ten years since the Board was formed. The Board is increasingly effective in integrating the policies of operation, development and administration of parks and park authorities placed under it by legislation, namely; the Provincial Parks under the Department of Lands and Forests, the Conservation Authorities (where recreation is a main function) under the Department of Energy and Resources Management, The Niagara Parks Commission, The St. Lawrence Parks Commission under the Department of Tourism and Information, and municipal parks under The Parks Assistance Act. Thus, the Board has a measure of control over one of the largest park systems in existence.

The resignation from the Cabinet on the 25th of November of the Honourable A. Kelso Roberts left the Chairmanship of the Board vacant. The Vice-Chairman, the Honourable James A. C. Auld, Minister of Tourism and Information acted as chairman for the remainder of the year.

Mr. Rene Brunelle was appointed Minister of the Department of Lands and Forests on the 25th of November, and thus became a member of the Board as designated in the Legislation. On the same date Mr. C. S. MacNaughton was appointed Provincial Treasurer, and thus according to legislation replaced the Honourable James N. Allan as a member of the Board. The other members remained unchanged namely; Mr. F. Guindon, Chairman of

The St. Lawrence Parks Commission; Mr. Charles Daley, Chairman of The Niagara Parks Commission; the Honourable J. W. Spooner, Minister of Municipal Affairs; the Honourable Wm. A. Stewart, Minister of Agriculture; the Honourable J. R. Simonett Minister of Energy and Resources Management; the Honourable S. J. Randall, Minister of Economics and Development; and the Honourable T. R. Connell, Minister of Public Works.

Thirteen regular meetings were held during the year, and one hundred and forty-five separate items of business were dealt with. Three delegations made representations to the Board during the year.

A delegation of four, representing the Ontario Parks Association met with the Board on the 21st of April to present a brief asking that (1) the ceiling of \$50,000 be deleted from Section 3 (2) of The Parks Assistance Act, and that a straight 50% grant for all costs of land acquisition, planning and development should remain as the only limiting factor; (2) that the gasoline tax funds now refunded to private boat users should be retained by the Province and used for grants under The Parks Assistance Act and The Conservation Authorities Act; (3) that the fee structure required under regulations of The Parks Assistance Act should be scaled to meet conditions in different areas of the Province; (4) that the Provincial portion of grants under the Act should be increased from 50% to 67% to provide more incentive for municipalities to provide park facilities for their own people.

A review of the structure of The Parks Assistance Act

was under way when the delegation requested the audience, and as a result of the review and the presentation of the brief by the Parks Association, the Board members made a recommendation to the Lieutenant Governor in Council, that the Act should be amended to raise the total grant from \$50,000 to \$100,000, and the total amount available for the purchase of lands for any park should not exceed \$25,000. The recommendation was adopted in the Legislature.

A delegation of thirteen from the Town of Orillia met with the Board on the 23rd of June to present a proposal urging the Province to acquire Chiefs Island in Lake Couchiching from the Rama Indian Band to be managed as a provincial park and maintained as nearly as possible in the present natural condition. The delegation included the member of the Legislature for Simcoe East, the mayor of the town of Orillia, and representatives of, the Rama Indian Council, the Chamber of Commerce, the Township of Mara, the local newspaper, the Fish and Game Conservation Club, and the Indian Agency. Following lengthy discussions with the delegation, the chairman appointed three members of the Board plus the secretary to act as a committee to inspect the Island. The Committee carried out the inspection on the 18th of August, and reported to the Board at a meeting on the 15th of September that, because (1) it would be difficult to justify an annual rental in the range of \$25,000 per year for the 147-acre island, and (2) if a provincial park were established, it would be impossible to retain the island in its present natural state, the Committee recommended that the policy of not establishing parks on islands

where access was only across stretches of open water, should be adhered to in this case. The Committee's recommendation was accepted.

The President of the Niagara Regional Development Council along with the General Manager and two members of the Council's parks committee, met with the Board on the 27th of October to ask for the establishment and development of a provincial park on the south shore of Lake Ontario. As a result of the meeting the Board members directed that the Department of Lands and Forests, and the Department of Public Works should re-study the area, and determine whether it was feasible and advisable to establish a provincial park in the Fifty Mile Point area of Lincoln and Wentworth counties. The investigations were proceeding at the end of the year.

The establishment of a provincial park at Carillon Falls Hydro site was discussed at the meeting on the 27th of October. It was decided that priority would be given to the matter of clearing up problems encountered in the transfer of the title of the surplus lands from the Hydro-Electric Power Commission of Ontario to the Province. Some campsites would be available early in 1967 in order to accommodate travellers to 'Expo 67'.

The Ninth Report of the Board (page 4) referred to a delegation from the City of Kingston requesting that a Parkway be built along the north shore of the Bay of Quinte, and to a report submitted by a joint committee of the St. Lawrence Parks Commission and the Department of Lands and Forests, who were directed to look into the ramifications of such a project..

The report indicated that the Department of Highways had parcels of surplus land along Highway #33 which might eventually become available for parkway use. The same Department suggested that portions of the Highway would require improvement and rebuilding in the future. It was concluded that parkway development immediately could cause problems when highway construction started. Also, records of use at Adolphustown Park at the western end of the area did not indicate that there was a pressing demand at present. In light of these facts the Board directed that a close liaison should be established between the planning sections of the Department of Highways and the St. Lawrence Parks Commission, in order that park and parkway interests could be given adequate consideration in any planning and programming of highway reconstruction and improvement in the Bay of Quinte area.

The increased demand for Canadian uranium caused a resurgence of prospecting for the element. It was reported that the newly established 90,000-acre Mississagi Provincial Park encompassed a considerable area of terrain where there was strong evidence that economically important deposits might be discovered. The matter was reviewed with the Deputy Ministers of the Department of Mines and of the Department of Lands and Forests and as a result, the Board directed that the two Departments reconsider the location of the boundaries of the Park, and recommend boundary locations which would make the best possible provision for the mining as well as the park interests. A recommendation had not been made to the Board at the end of the year.

THE PROVINCIAL PARKS ACT

(1)

The consideration of sites for new provincial parks is a major function of the Board, and within the term covered by this report, ten sites proved to be satisfactory for the eventual development.

Three of these were approved for development as soon as sufficient land could be acquired. One, at the mouth of the Moose River at Moosonee and consisting of all crown land, was passed for the immediate establishment as a park.

The acquiring of private land for future new parks was approved for five sites, and some of the required lands were purchased.

Negotiations were in process to acquire a 465-acre island on the Trent-Severn Waterway from the Government of Canada for development as a future boat-camping area, anchorage and dock.

Approval was given to acquire flooding rights immediately west of Earl Rowe Provincial Park to protect the interest of the Province against claims for damages which might arise as a result of the raising of water levels in the newly constructed dam for aquatically oriented activities on the Boyne River within the Park.

A rural school site and building adjoining Earl Rowe Park on the west were declared surplus by the local school board and approved for purchase by the Province to become part of the Park.

..... (2)

In Sibley Provincial Park the transfer of a small parcel of land to the Department of Highways was approved in order that Highway #587 could be rerouted, improved, and rebuilt. The Board members also directed that any surplus lands resulting from the rerouting should become part of the Park.

The purchase of 45 properties approved for additions to 12 operating provincial parks was completed during 1966, thus adding about 884 acres of new park lands to the system. Thirty properties totalling some 4,274 acres were purchased during the same period to enlarge and consolidate new park sites not yet placed in operation. Killbear Provincial Park was enlarged by the addition of 516 acres of adjoining crown lands with the approval of the Board members.

The recommendation that 2,400 acres of crown land be added to Ivanhoe Provincial Park was accepted by the members of the Board. The newly added lands have a high potential for park development. At the same time it was agreed that about 620 acres of marginal lands from the park development standpoint, and cut off from the rest of the park land by a well-travelled road, should be deleted from the park. These two actions will result in more effective use and more efficient operation of the Park.

The boundary of Balsam Lake Provincial Park was extended for a distance of 400 ft. into Balsam Lake so that proper control over activities along the waterfront could be exercised..

THE PROVINCIAL PARKS ACT

(3)

All provincial parks with water frontage now have boundaries extending into the adjoining waters at distances varying from one-half the width of a channel where the distance is less than 300 feet, up to one-quarter mile in the case of Great Lakes frontage.

The purchase of properties offered for sale at Wasaga Beach continued when and where satisfactory prices could be negotiated. Leasehold interests offered for sale in Algonquin and Rondeau Provincial Parks were purchased when reasonable prices were negotiated.

Additional tabular information regarding provincial parks can be found in the Appendix to this report.

THE PARKS ASSISTANCE ACT

(1)

Reference is made earlier in this report to changes in the legislation regarding this Act. The changes as outlined opened the way for some municipalities such as the Cities of Fort William, Peterborough, Sarnia, and Sault Ste. Marie, which had already reached the total of \$50,000 under the former system, to apply again for additional funds to carry out further development. Peterborough and Sarnia took advantage of this favourable change during 1966. The Municipalities of the Town of Cobourg, the Village of Iroquois, the Township of North Walsingham, and the Township of Saugeen, applied for and were given authority to establish new "Approved Parks" under the Act. Cobourg converted municipally owned lands into an "Approved Park" as did Iroquois. The Townships, Walsingham and Saugeen used the monies made available, for land purchase as well as preliminary development. Sixteen grants were approved for a total of \$207,395. This figure represents only the Province's 50% share of the total expenditure of \$414,790 on the purchase and/or development of 933 acres of park land.

One municipality applied to have the clause, requiring that a park operated under this Act should charge fees "which shall not be less than the fees charged in provincial parks", removed from the regulations, or scaled downward. The Board members had an inspection of the park made, and concluded from the subsequent report that the municipality had developed a good park with facilities as good or better than those found

..... (2)

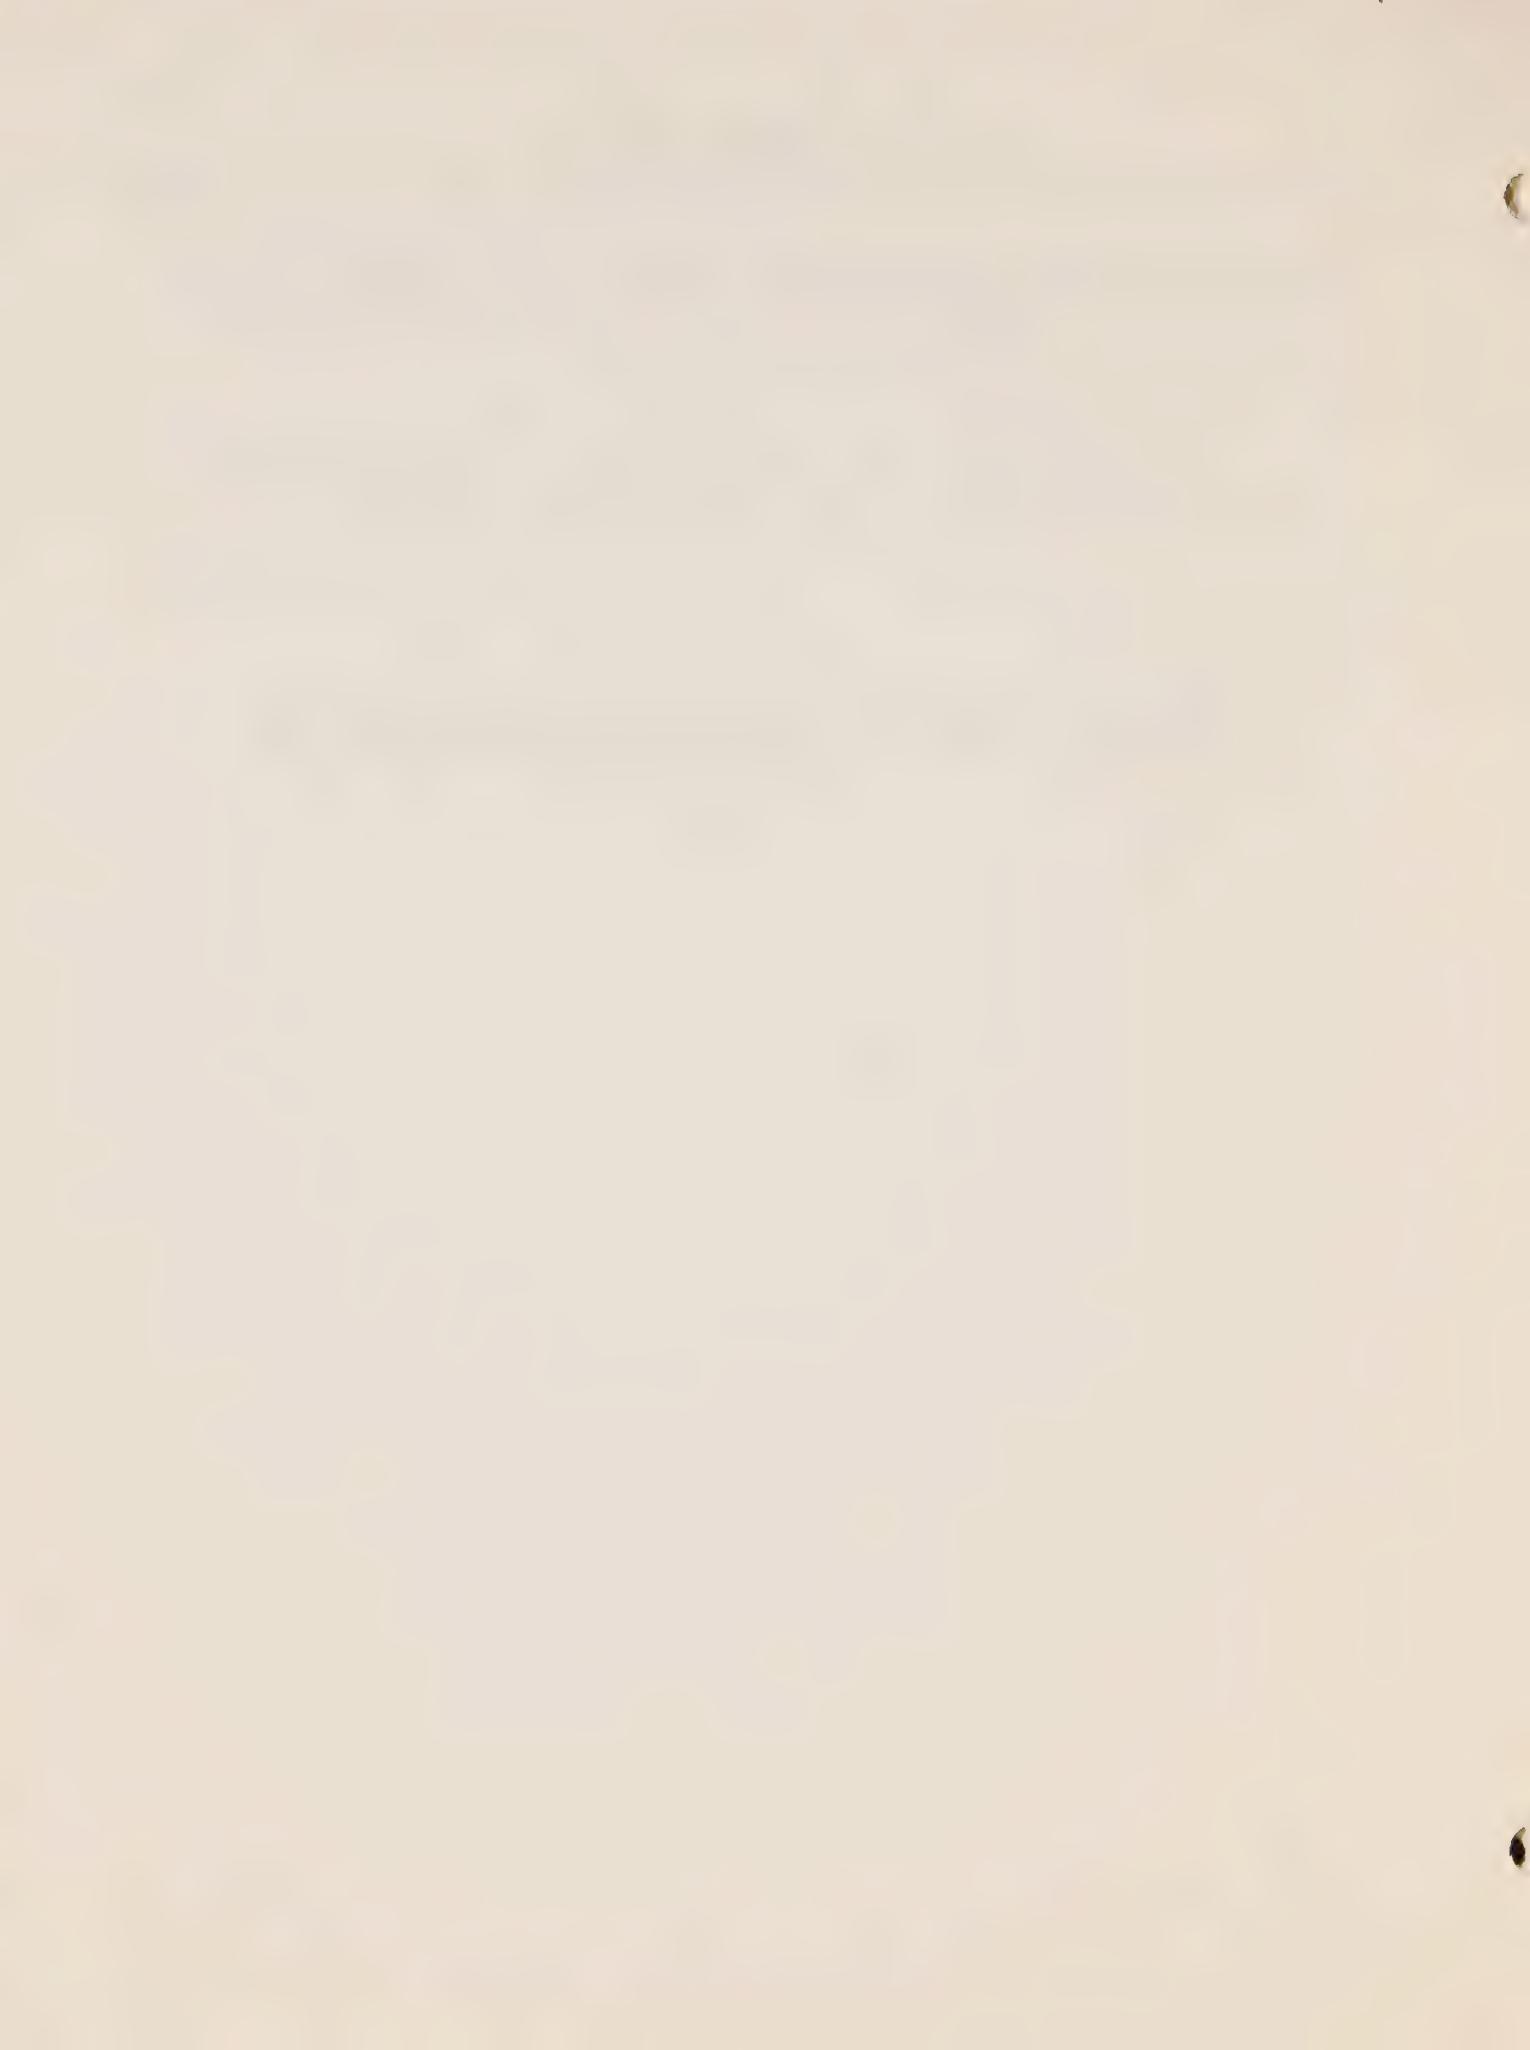

THE PARKS ASSISTANCE ACT

(2)

in most provincial parks and therefore, the charges as outlined in the regulations should stand.

The Cape Croker, and Kettle Point, Indian Bands were among those who applied for grants during the year.

Additional information regarding grants under this Act will be found in tabular form in the Appendix.

THE NIAGARA PARKS COMMISSION ACT

There were no items dealing with this Commission which required a decision from the Ontario Parks Integration Board during the time period covered by this report.

Some information will be found in tabular form in the Appendix.

THE ST. LAWRENCE PARKS COMMISSION ACT

The staff of the St. Lawrence Parks Commission, in cooperation with their counterparts in the Department of Lands and Forests, were responsible for the report on the Quinte Parkway proposal which was mentioned in the Ninth Report of the Board. As a result of this report a request was made to have a property purchased to provide a picnic area with sanitary facilities along the proposed parkway route. The Department of Public Works was still negotiating for the property when the year ended.

A large parcel of land in the Township of Wolfe Island was approved for purchase under the provincial parkland acquisition program, and it was directed that the Commission assume responsibilities for development and administration when the purchase was completed.. This was in agreement with the decision reached at a meeting of the Board held on the 20th of August 1958, whereby the St. Lawrence Parks Commission would confine its sphere of operations to the waterfront of the St. Lawrence River and the eastern end of Lake Ontario.

Board approval was also given to purchase land adjoining Glengarry Park so that heavily used facilities could be enlarged and improved to accommodate the large numbers of people who frequent the park. This purchase was also under negotiation at the end of the period covered in this report.

Additional information on this section will be found in the Appendix.

THE CONSERVATION AUTHORITIES ACT

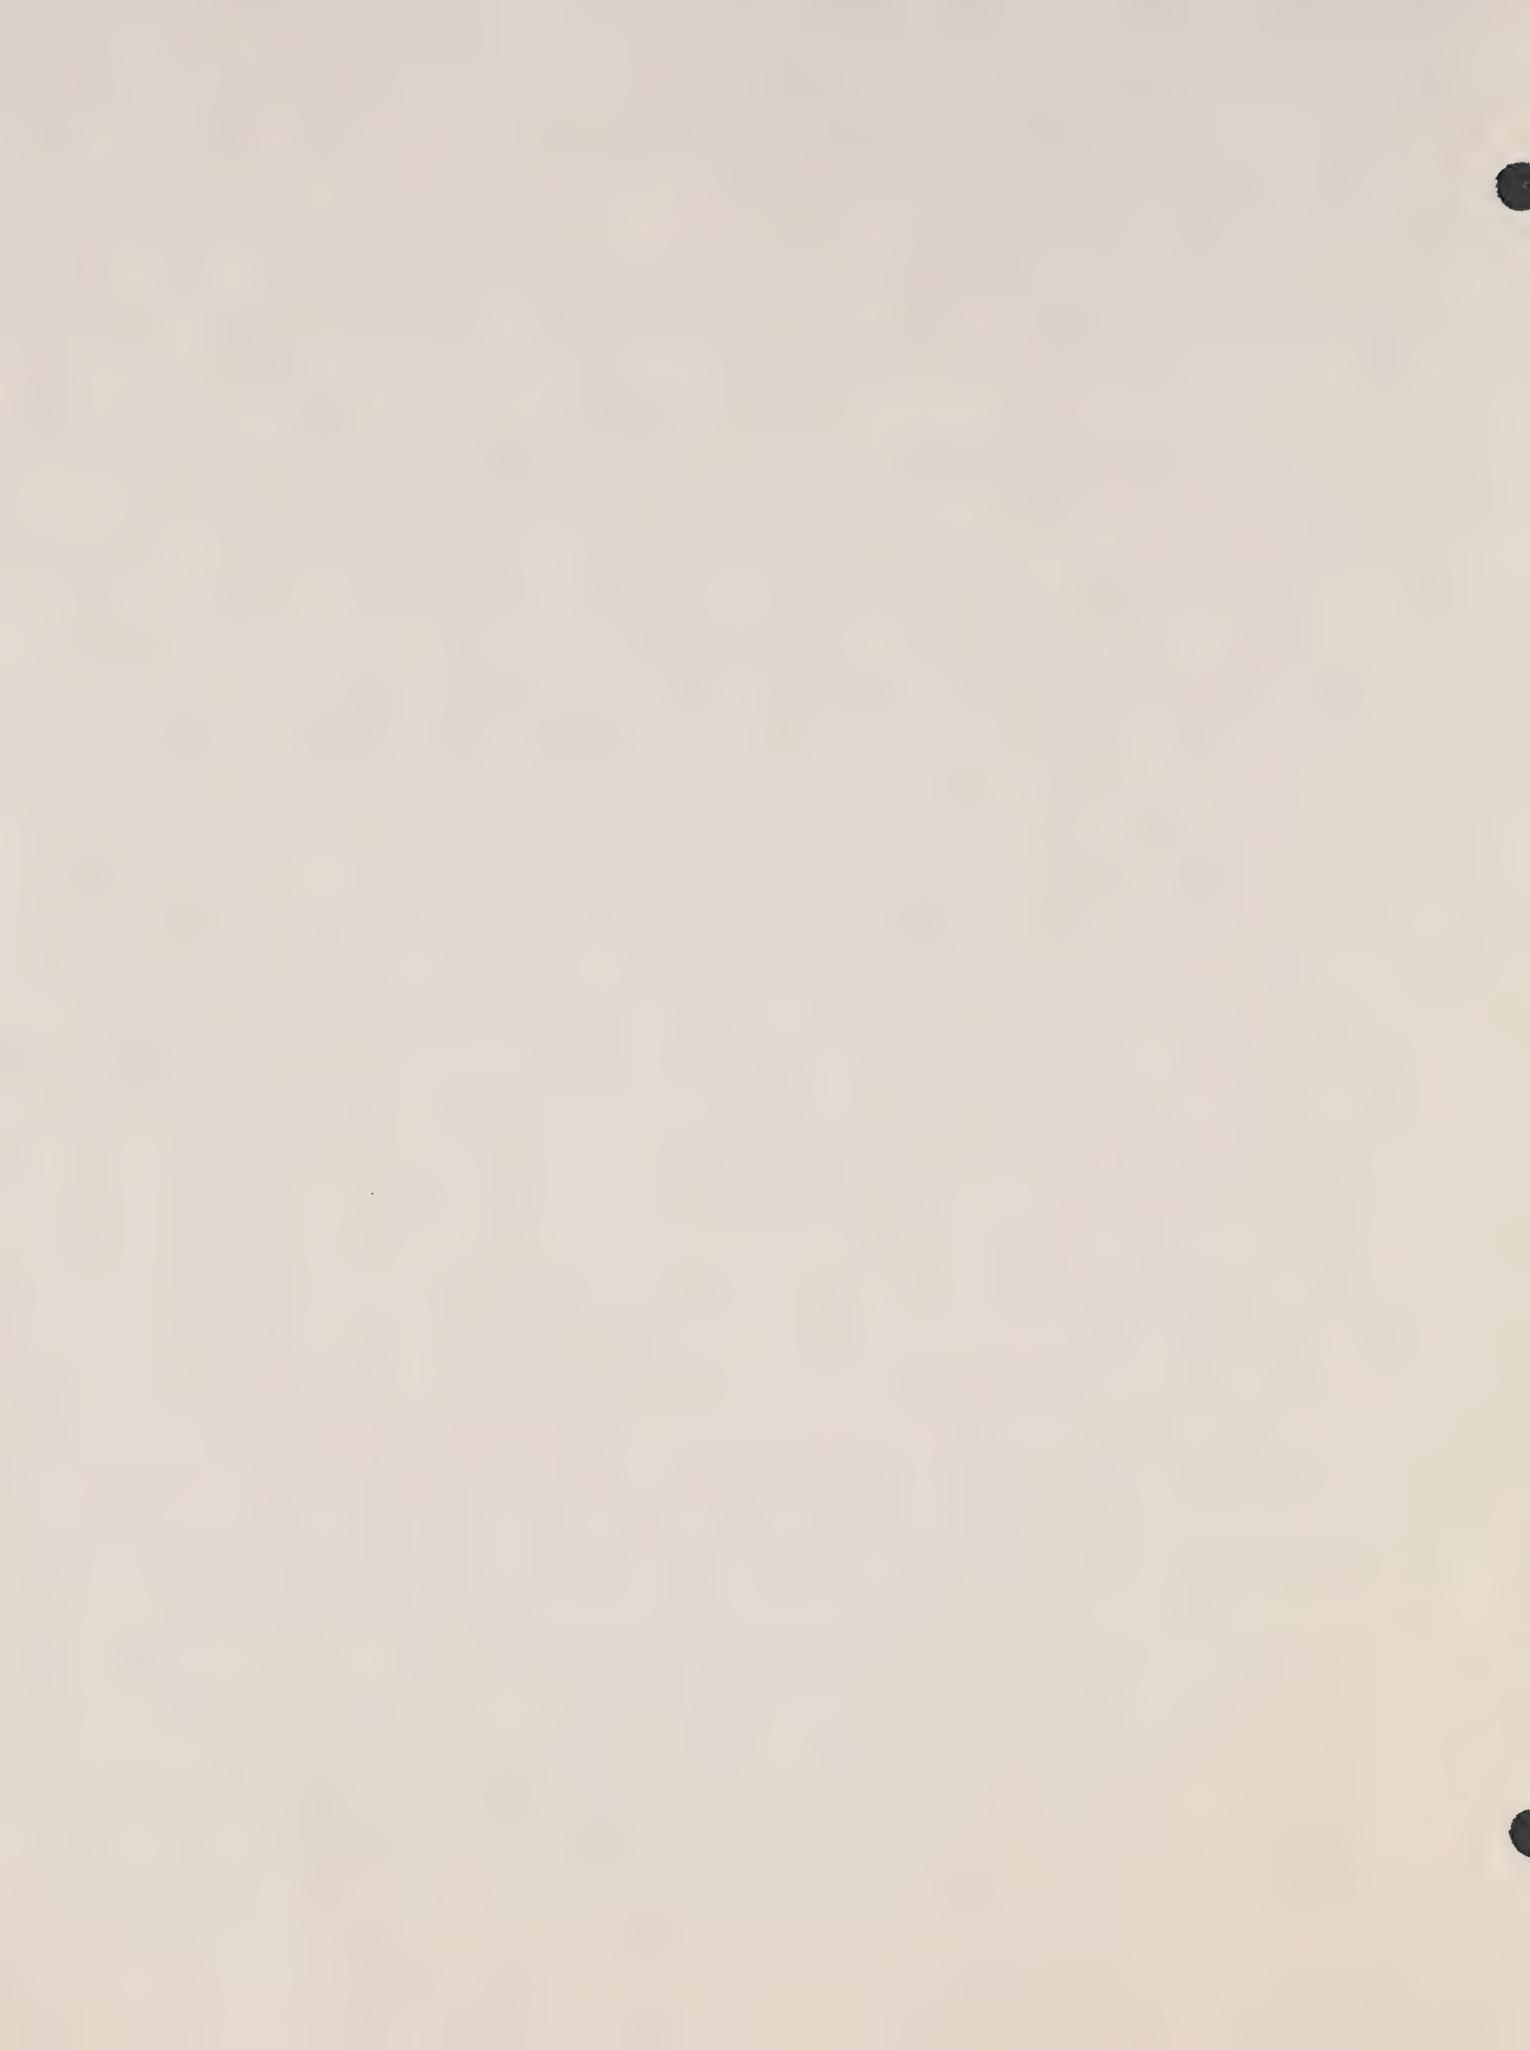

(1)

The Ontario Parks Integration Board deals with matters under this Act only where park land and recreation facilities are involved. The provision of these two items has become during the past seven years one of the major functions of the Conservation Authorities. All grants in excess of \$5,000 under the Act must have Board approval. Grants totalling less than this amount may be made by the Minister administering the Act, if he so wishes, or he may refer any of them to the Board for consideration.

Regulations governing the use of the Conservation Areas providing park and recreation facilities are also approved by the Board. It has been the policy to make every effort to encourage and promote uniformity in regulations among the various Authorities across the Province. Some problems have arisen with regard to standardization of the fees charged for the use facilities provided, because some Authorities are able to obtain and spend more monies for development than others. The charges approved for provincial parks are used as a general basis for standardization, but because of the wide variation in terrain, facilities, and services, complete uniformity is impossible at present.

New regulations were approved for the Big Creek Conservation Authority, and revisions of sections of the regulations dealing with fees and charges were approved for the Credit Valley Conservation Authority and the Metropolitan Toronto and Region Conservation Authority. The Board members

... (2)

THE CONSERVATION AUTHORITIES ACT

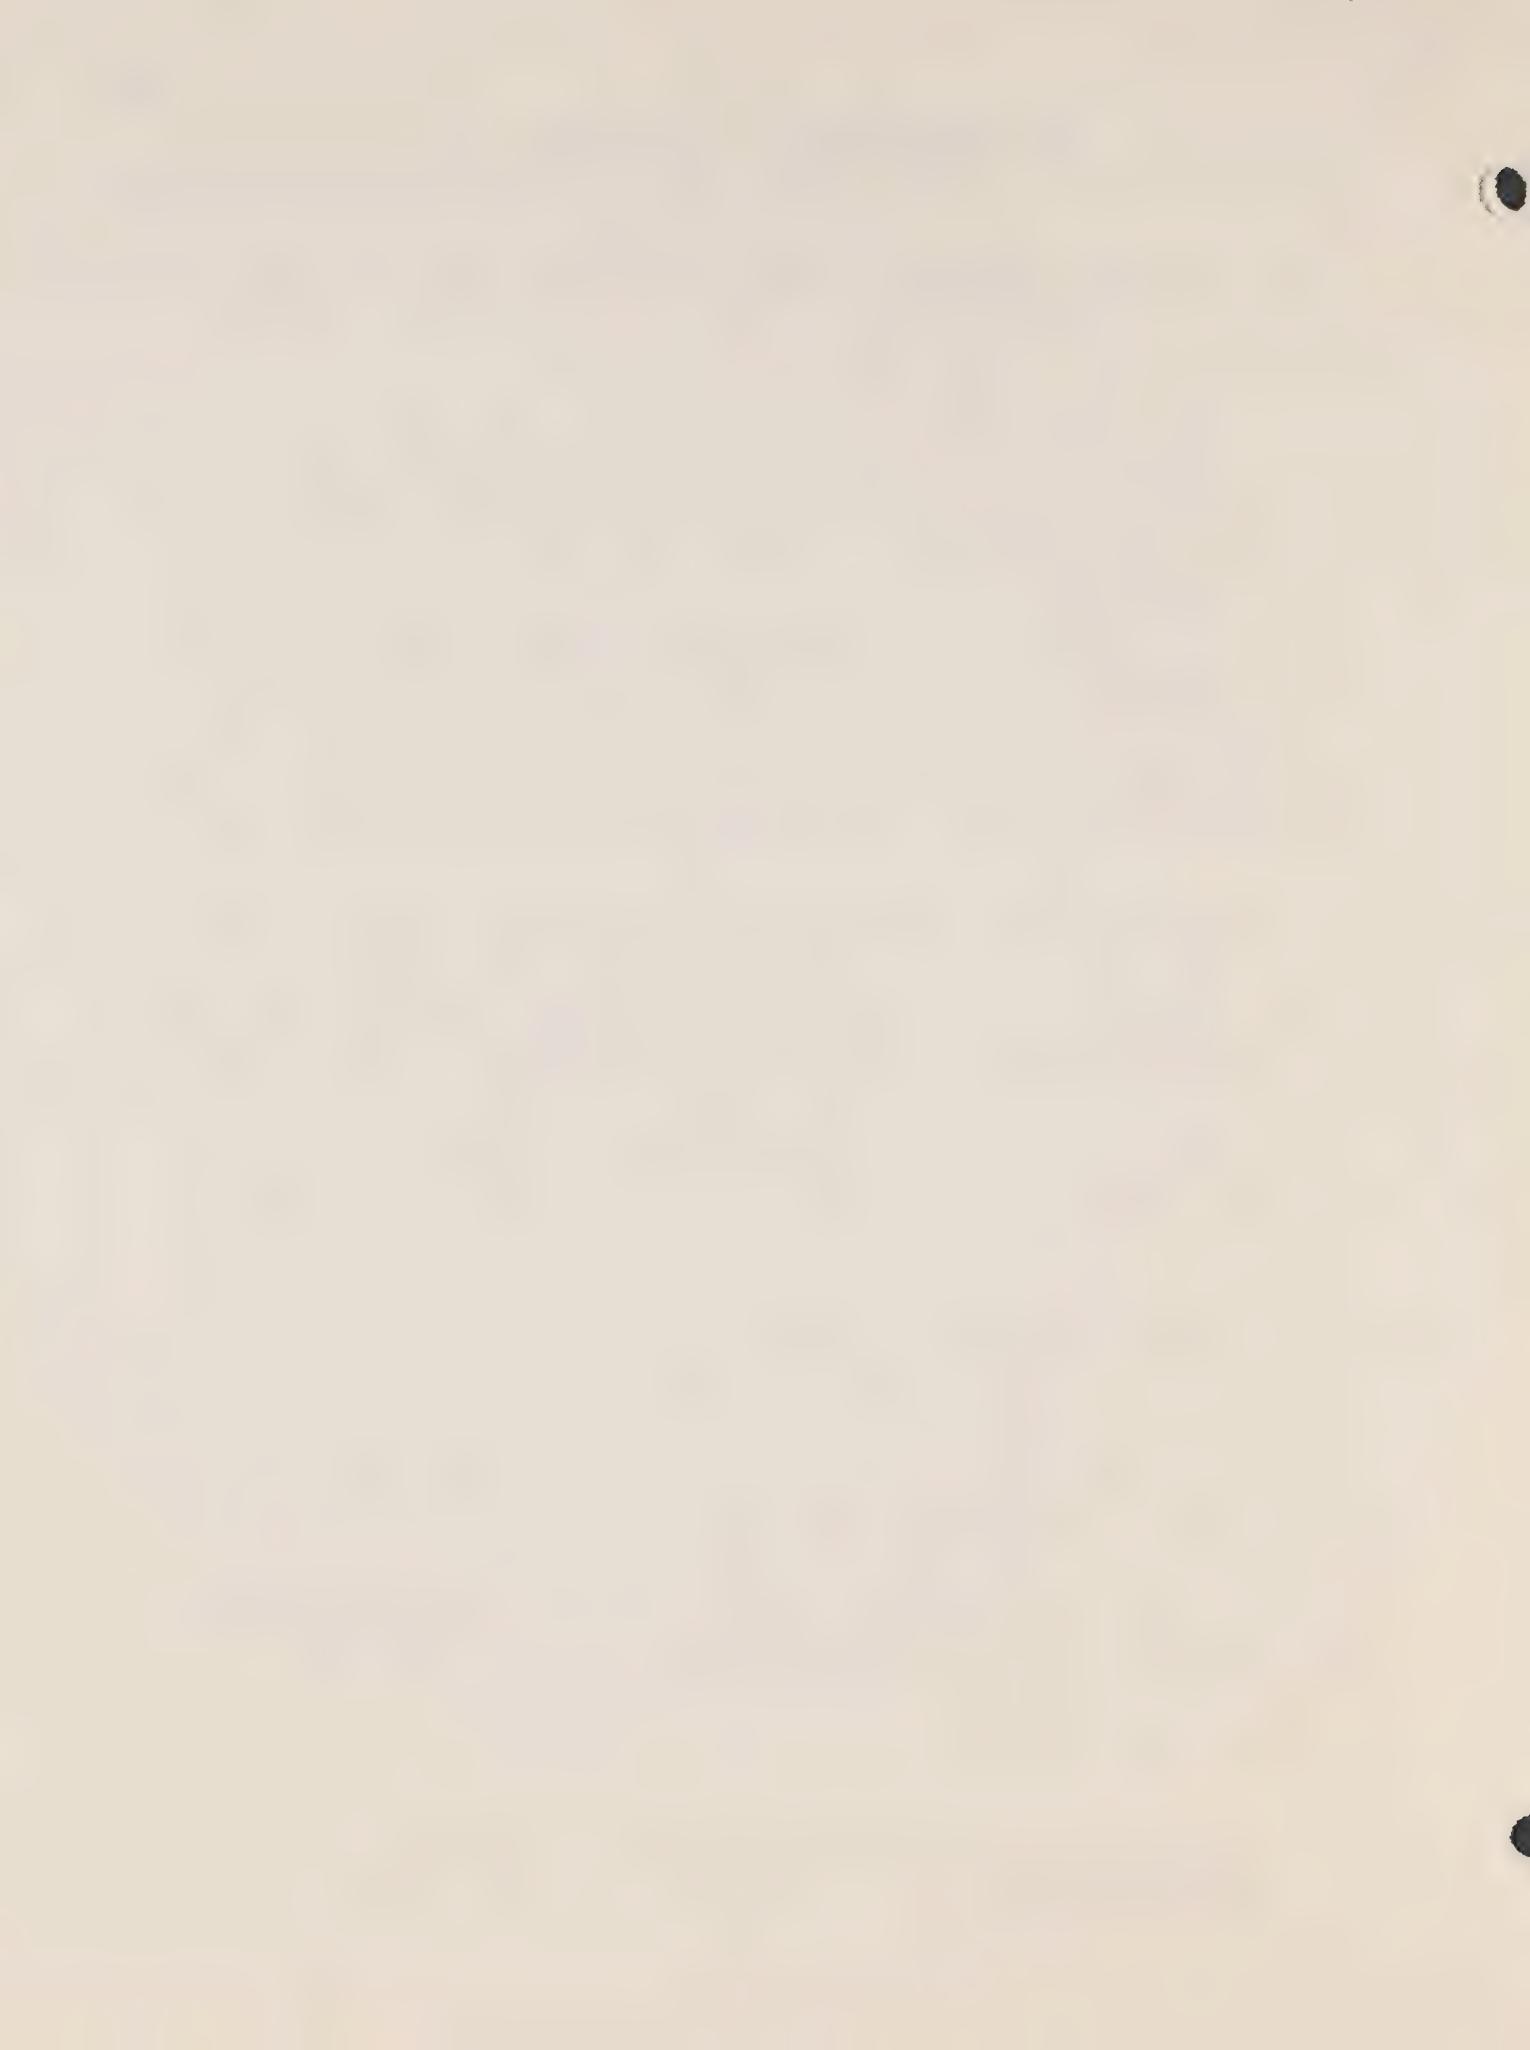

(2)

encourage the charging of fees which will pay the costs of maintenance and operation of the Areas.

Late in the year the Board members directed that a study be made of the feasibility of some of the Conservation Areas providing for overnight camping, especially in the Toronto-Hamilton region. Some Authorities already provide this facility, and most of them extend the privilege to groups such as Boy Scouts and Girl Guides, but not to individuals or families. No report had been submitted at the end of the year.

Twelve grants totalling \$352,735.50 were approved for land purchase. This figure represents the Province's 50% of the cost contribution toward the acquisition of approximately 1260 acres of land for six Conservation Authorities and ten separate Conservation Areas. There were twenty-nine 50% of the cost grants approved for ten Conservation Authorities for capital development projects in nineteen Conservation Areas. These grants totalled \$383,552.50 and affected some 11,754.5 acres of Conservation Area lands. The total 50% contribution from Provincial funds approved was \$736,308.00 as compared to \$546,814.50 contributed in 1965 and reported in the Ninth Report -- an increase of \$189,493.50 over a twelve month period.

Additional tabular information will be found in the Appendix.

CONCLUSION

The Board continued as an important integrating body in the impressive park system being developed in the Province of Ontario. A strong influence was exerted to control and eliminate duplication of effort and expenditure, and to bring about the orderly development of a serviceable, noteworthy park complex.

Sites for important new parks are continually under investigation, as are new methods and types of development to accommodate the ever changing demands of the people who seek outdoor recreation.

The volume of business conducted by the Board has continued to show a marked increase each year since the Act first became law.

The material presented in tabular form appended to this report gives information not easily shown in a text.

Compiled this 21st day of February 1968.

C. R. Tilt,
Secretary.
